H1000 Humidifier - 48 ltr / day

- This high capacity mobile humidifier is perfect for maintaining humidity levels in larger rooms up to 1,000m³. The HumEvap Mobile incorporates a rotating drum that evaporates moisture through a filter media.
- Fitted with an anti-bacterial air filter to provide the added benefit of air filtration removing dust and airborne pollutants. As well as this the unit provides a pleasant cooling effect from the evaporation of the water chilling the air that is expelled.
- Low energy
- Large 34 litre capacity reservoir
- Integral automatic humidistat
- A two speed control panel varies its 2kg of moisture per hour output, depending on the requirement, alongside an adjustable humidistat that automatically maintains a precise humidity level in an environment.
- The water tank holds an impressive 34 litres so does not require constant filling. Even when it does need topping up, the easy-fill water funnel makes this task quick, simple and mess-free.
- Can be supplied with the facility to connect it directly to a mains water supply for a more permanent humidification solution.
- Large humidification capacity will evaporate up to 48 litres per day
- Easy-fill water funnel
- Wheels for easy moving
